Evaluate Final Project

Learning Outcome:

Evaluate the effectiveness of the IT solution in addressing the client organization's problem and reflect on how the project experiences can improve your IT knowledge and guide future learning.

Bloom's Level: 5 – Evaluating

Students will be first given the assignment in **module 13**.

Students will turn in the assignment after **module 13**.

INTRO TO INFORMATION TECHNOLOGY INSTRUCTIONS

What is the primary focus of the Evaluate Final Project assignment?

For this assignment, you will reflect on your experiences in the final project and evaluate how the experiences contributed to solving the client's problem, as well as what you learned about information technology and collaboratively working with community organizations to solve a problem.

What is the final project learning experience evaluation?

The final project learning experience evaluation is a document that records your evaluations and reflections about your experiences with the final project..

What is the purpose of the Evaluate Final Project assignment?

The purpose of the Evaluate Your Final Project assignment is to encourage you to frankly judge how well you met the goals you proposed for the project and to reflect on what you learned from the experience. Both factors help you to plan future learning to further your information technology and collaborative problem-solving knowledge and skills

What are the components of a final project evaluation?

- Name of the client organization
- How you think your IT solution helped the client organization
- How the client thinks your IT solution helped them
- Differences between what you proposed and the project deliverable
- The most important thing you learned from engaging in the project
- One thing you might do differently in future IT projects
- An aspect of the project was the biggest surprise to you
- Learning and development plans you plan to pursue based on your experiences

What activities are performed during the Evaluate Final Project assignment?

- Review the documentation you have produced for the project
- Reflect upon your experience with the project.
- Discuss the final project outcomes with the client and obtain their feedback

Evaluate
Final Project

Learning Outcome:

Evaluate the effectiveness of the IT solution in addressing the client organization's problem and reflect on how the project experiences can improve your IT knowledge and guide future learning.

Bloom's Level: 5 - Evaluating

Students will be first given the assignment in **module 13**.

Students will turn in the assignment after **module 13**.

Cont.

- Compare actual deliverables with what you proposed
- Prepare a document addressing each of the reflection components in a paragraph
- Submit the final project evaluation document to the assignment dropbox

What advice would help me with this assignment?

- Self-evaluation and reflection is a challenge, but try to be as objective as possible during the exercise.
- A valuable part of professional growth and development is to acknowledge and learn from both the good and bad experiences we encounter in a complex task like this project.
